

OutlineFx

Post Effect for Unity Urp and VolFx by **NullTale** + + ✨
Quick Guide

Add **OutlineFilter** render feature to
UrpRenderer

* note that UrpAsset can be overridden by
Unity QualitySettings

Render feature contains general settings for default
mode and color. If you want they don't mix at
runtime.

Configure Outline settings via VolumeProfile

* note that to work in depth mode depth texture option must be enabled in urp asset setting
